

# Feathertouch SCT MicroFocuser

## Installation Instructions – Celestron CPC-1100 Telescopes

**Important:** The telescope optical tube must be positioned horizontally before removing the original focus assembly. If the telescope is not horizontal the primary mirror could move during the installation.

**Parts List:** Feathertouch SCT MicroFocuser

**Additional Required Tools:** Phillips Screwdriver  
Wrench: 1/2" or adjustable

### Step 1 Remove Focus Knob

Begin by removing the black rubber focus knob from the scope. This knob simply pulls off the brass focus cylinder.
